

# Thanks Karen!

Government officials know they can not legally mandate masks because it is a violation of the Constitution and 42 U.S.C. §2000a. So, they rely on self appointed hall monitors (Karens) to employ cancel culture to harass fellow citizens. They also rely on “Karen” to be deliberately unaware of the actual science regarding masks.

## Actual Science Facts:

1. Covid-19 has a 99.8% survival rate according to the CDC.
2. The mask on your face has holes that measure 100 microns.
3. The Sars-Cov2 virus measures 1/10<sup>th</sup> of one micron, so it can float over, around, and through your mask.
4. There is precisely zero scientific studies showing a masked public can stop a virus.
5. Health departments have failed to provide the public with any actual evidence that masks can stop a virus.
6. A current lawsuit in Federal Court demands that Ohio provide the “science” used to justify mask mandates. They refuse to provide that science.

Your mask is nothing more than a superstitious religious symbol of compliance. I don't choose to follow your religion whether it's been dictated by the Health Department or by store policy.
